PROFESSIONAL SUMMARY

Software Engineer with **2+ years** of professional experience contributing to end-to-end software development in production environments, spanning fintech trading platforms, mobile apps, and developer-facing charting tools.

EXPERIENCE

Full Stack Developer — Infitout Financial Technologies

Mar 2024 – Present

Full Stack Developer (Full-time)

Jun 2024 – Present

- Built a cross-platform **Flutter** mobile trading application spanning **30+ screens**, including eKYC/eSign flows and options trading UX.
- Engineered an **algorithmic trading system** for automated strategy execution and real-time trade monitoring over low-latency **WebSockets**, supporting **1,000+ concurrent users**.
- Designed a trading portfolio analysis platform with **AI-powered analysis** for tracking positions and performance metrics.
- Developed 5+ marketing landing pages and automated report generation workflows, cutting manual turnaround time by **~40%**.
- Led development of a proprietary **charting library** for brokers, matching the feature set of the leading market charting tool while being **2x faster** and **~50% smaller**, with an easy broker-adapter integration.
- Extended the charting library with an **MCP-based tool** for generating custom indicator and strategy scripts, an **AI chatbot** for chart analysis, a custom scripting engine, and built-in strategy backtesting.

Full Stack Developer Intern

Mar 2024 – May 2024

- Rebranded and rebuilt the **F&O (Futures & Options) trading website** across **25+ pages**, cutting page load time by **~35%** and improving code quality and maintainability.

React Native Android Developer Intern — DFPL

Dec 2023 – Feb 2024

- Architected a full-featured **React Native** mobile app with **20+ screens** covering menu management, order placement, real-time tracking, maps, and payment gateway.
- Deployed a responsive **Next.js** website with SEO-optimized performance, plus income analytics dashboards for sales and revenue visibility.

Mobile Application Developer Intern — Cwipedia

Jun 2023 – Sep 2023

- Built a cross-platform edtech app using **React Native** and **Firebase** for browsing, purchasing, and streaming **100+ video courses** with seamless playback.
- Integrated secure auth, course catalog with search and filtering, and auto-graded in-app assessments, contributing to measurable improvements in learner engagement.

PROJECTS

Trading Terminal

- Developed a modular, **widget-driven** trading terminal with charts, option chain, orders, analytics, payoff graph, and strategy builder.
- Enabled users to add, remove, and freely resize **multiple widgets** on one screen, with broker sign-in, keeping the layout smooth even with several live widgets open.

Academic Calendar

- Created a **React Native** app with **Firebase** backend supporting full CRUD for events, streams, departments, and semesters.
- Implemented real-time data sync and multi-role authentication for students, faculty, and admins.

2D-to-3D Drawing & Defect Analyzer

- Developed a **React Native + Python** app that converts scanned 2D drawings into 3D models.
- Added image-based defect detection to automatically flag inconsistencies and defects in scanned drawings.

SKILLS

Languages & Frameworks: JavaScript, Python, React.js, Next.js, React Native, Flutter, FastAPI

Tools & Technologies: WebSockets, Git, Firebase, MongoDB, REST APIs

EDUCATION

Bachelor of Engineering in Computer Science

KLE Dr. MS Sheshgiri College of Engineering, Belgaum, India • Dec 2020 – Jun 2024

ACHIEVEMENT

Secured KSCST funding under the SSP for the 2D-to-3D Drawing & Defect Analyzer, built as the final year project.
